

EECS 10: Computational Methods in Electrical and Computer Engineering

Lecture 14

Rainer Dömer

doemer@uci.edu

The Henry Samueli School of Engineering
Electrical Engineering and Computer Science
University of California, Irvine

Lecture 14: Overview

- Course Administration
 - Reminder: Midterm course evaluation
- Functions
 - Math library functions
 - Example `Function.c`
 - Standard library functions
 - Example `Dice.c`

Course Administration

- Midterm Course Evaluation
 - Open until Monday, 8pm!
 - Oct. 31, 2007, 8am - Nov. 5, 2007, 8pm
 - Online via EEE Evaluation application
- Feedback from students to instructors
 - Completely voluntary
 - Completely anonymous
 - Very valuable
 - Help to improve this class!
- Mandatory Final Course Evaluation
 - expected for week 10 (TBA)

Math Library Functions

- C standard math library
 - standard library supplied with every C compiler
 - predefined mathematical functions
 - e.g. `cos(x)`, `sqrt(x)`, etc.
- Math library header file
 - contains math function declarations
 - `#include <math.h>`
- Math library linker file
 - contains math function definitions (pre-compiled)
 - library file `libm.a`
 - compiler needs to *link* against the math library
 - use option `-llibraryname`
 - Example: `gcc MathProgram.c -o MathProgram -lm`

Math Library Functions

- Functions declared in `math.h` (part 1/2)

- <code>double sqrt(double x);</code>	\sqrt{x}
- <code>double pow(double x, double y);</code>	x^y
- <code>double exp(double x);</code>	e^x
- <code>double log(double x);</code>	$\log(x)$
- <code>double log10(double x);</code>	$\log_{10}(x)$
- <code>double ceil(double x);</code>	$\lceil x \rceil$
- <code>double floor(double x);</code>	$\lfloor x \rfloor$
- <code>double fabs(double x);</code>	$ x $
- <code>double fmod(double x, double y);</code>	$x \bmod y$

Math Library Functions

- Functions declared in `math.h` (part 2/2)

- <code>double cos(double x);</code>	$\cos(x)$
- <code>double sin(double x);</code>	$\sin(x)$
- <code>double tan(double x);</code>	$\tan(x)$
- <code>double acos(double x);</code>	$\arccos(x)$
- <code>double asin(double x);</code>	$\arcsin(x)$
- <code>double atan(double x);</code>	$\arctan(x)$
- <code>double cosh(double x);</code>	$\cosh(x)$
- <code>double sinh(double x);</code>	$\sinh(x)$
- <code>double tanh(double x);</code>	$\tanh(x)$

Math Library Functions

- Program example: **Function.c** (part 1/3)

```
/* Function.c: compute a math function table */  
/*  
 * author: Rainer Doemer  
 */  
/*  
 * modifications:  
 */  
/* 10/28/04 RD initial version */  
  
#include <stdio.h>  
#include <math.h>  
  
/* function definition */  
  
double f(double x)  
{  
    return cos(x);  
} /* end of f */  
  
...
```

Math Library Functions

- Program example: **Function.c** (part 2/3)

```
...  
/* main function */  
  
int main(void)  
{  
    /* variable definitions */  
    double hi, lo, step;  
    double x, y;  
  
    /* input section */  
    printf("Please enter the lower bound: ");  
    scanf("%lf", &lo);  
    printf("Please enter the upper bound: ");  
    scanf("%lf", &hi);  
    printf("Please enter the step size: ");  
    scanf("%lf", &step);  
  
    ...
```

Math Library Functions

- Program example: **Function.c** (part 3/3)

```
...
/* computation and output section */
for(x = lo; x <= hi; x += step)
{
    y = f(x);
    printf("f(%10g) = %10g\n", x, y);
} /* rof */

/* exit */
return 0;
} /* end of main */

/* EOF */
```

Math Library Functions

- Example session: **Function.c**

```
% vi Function.c
% gcc Function.c -o Function -Wall -ansi -lm
% Function
Please enter the lower bound: -0.5
Please enter the upper bound: 1.0
Please enter the step size: .1
f( -0.5) = 0.877583
f( -0.4) = 0.921061
f( -0.3) = 0.955336
f( -0.2) = 0.980067
f( -0.1) = 0.995004
f(-2.77556e-17) = 1
f( 0.1) = 0.995004
f( 0.2) = 0.980067
f( 0.3) = 0.955336
f( 0.4) = 0.921061
f( 0.5) = 0.877583
f( 0.6) = 0.825336
f( 0.7) = 0.764842
f( 0.8) = 0.696707
f( 0.9) = 0.62161
f( 1) = 0.540302
%
```

Standard Library Functions

- Standard C library
 - standard library supplied with every C compiler
 - predefined standard functions
 - e.g. `printf()`, `scanf()`, etc.
- C library header files
 - input/output function declarations `#include <stdio.h>`
 - standard function declarations `#include <stdlib.h>`
 - time function declarations `#include <time.h>`
 - etc.
- C library linker file
 - contains standard function definitions (pre-compiled)
 - library file `libc.a`
 - compiler *automatically links* against the standard library (no need to supply extra options)

Standard Library Functions

- Functions declared in `stdlib.h` (partial list)
 - `int abs(int x);`
 - `long int labs(long int x);`
 - return the absolute value of a (long) integer `x`
 - `int rand(void);`
 - return a random value in the range 0 – `RAND_MAX`
 - `RAND_MAX` is a constant integer (e.g. 32767)
 - `void srand(unsigned int seed);`
 - initialize the random number generator with value `seed`
 - `void exit(int result);`
 - exit the program with return value `result`
 - `void abort(void);`
 - abort the program (with an error result)

Standard Library Functions

- Random number generation
 - Standard library provides *pseudo* random number generator
 - `int rand(void);`
 - Pseudo random numbers are a sequence of values seemingly random in the range 0 – `RAND_MAX`
 - Computer is a *deterministic* machine
 - Sequence will always be the same
 - Start of sequence is determined by seed value
 - `void srand(unsigned int seed);`
 - Trick: Initialize random sequence with current time
 - header file `time.h` declares function `unsigned int time()`
 - `time(0)` returns number of seconds since Jan 1, 1970
 - at beginning of program, use:
`srand(time(0));`

Standard Library Functions

- Program example: `Dice.c` (part 1/4)

```
/* Dice.c: roll the dice */  
/* author: Rainer Doemer */  
/* modifications: */  
/* 10/28/04 RD initial version */  
  
#include <stdio.h>  
#include <stdlib.h>  
#include <time.h>  
  
/* function definition */  
  
int roll(void)  
{  
    int r;  
  
    r = rand() % 6 + 1;  
    /* printf("Rolled a %d.\n", r); */  
    return r;  
} /* end of roll */  
...
```

Standard Library Functions

- Program example: **Dice.c** (part 2/4)

```
...
/* main function */

int main(void)
{
    /* variable definitions */
    int i, n;
    int count1 = 0, count2 = 0, count3 = 0,
        count4 = 0, count5 = 0, count6 = 0;

    /* random number generator initialization */
    srand(time(0));

    /* input section */
    printf("Roll the dice: How many times? ");
    scanf("%d", &n);

    ...
}
```

Standard Library Functions

- Program example: **Dice.c** (part 3/4)

```
... /* computation section */
for(i = 0; i < n; i++)
{
    switch(roll())
    {
        case 1:
            { count1++; break; }
        case 2:
            { count2++; break; }
        case 3:
            { count3++; break; }
        case 4:
            { count4++; break; }
        case 5:
            { count5++; break; }
        case 6:
            { count6++; break; }
        default:
            { printf("INVALID ROLL!");
                exit(10);
            } /* htiws */
    } /* rof */
...
}
```

Standard Library Functions

- Program example: **Dice.c** (part 4/4)

```
...
/* output section */
printf("Rolled a 1 %5d times.\n", count1);
printf("Rolled a 2 %5d times.\n", count2);
printf("Rolled a 3 %5d times.\n", count3);
printf("Rolled a 4 %5d times.\n", count4);
printf("Rolled a 5 %5d times.\n", count5);
printf("Rolled a 6 %5d times.\n", count6);

/* exit */
return 0;
} /* end of main */

/* EOF */
```

Standard Library Functions

- Example session: **Dice.c**

```
% vi Dice.c
% gcc Dice.c -o Dice -Wall -ansi
% Dice
Roll the dice: How many times? 6000
Rolled a 1  963 times.
Rolled a 2  995 times.
Rolled a 3  1038 times.
Rolled a 4  1024 times.
Rolled a 5  984 times.
Rolled a 6  996 times.
% Dice
Roll the dice: How many times? 6000
Rolled a 1  977 times.
Rolled a 2  1043 times.
Rolled a 3  1012 times.
Rolled a 4  1001 times.
Rolled a 5  963 times.
Rolled a 6  1004 times.
%
```
