

EECS 211  
Advanced System Software  
Winter 2009

## Assignment 6

**Posted:** March 5, 2009  
**Due:** March 16, 2009

**Topic:** User programs and system calls in Nachos

### Instructions:

The goal of this assignment is to complete the previous Assignment 5.

There are two options:

#### Option 1: Leave as submitted for HW5 (10 bonus points)

If you choose Option 1, the previously submitted files for Assignment 5 will count “as is” (no further adjustment). There is no need to submit anything. You will receive 10 points extra homework credit for this option.

#### Option 2: Resubmit Assignment 5

If you choose Option 2, you may resubmit the files for Assignment 5. Your submission will then be re-graded based on the new files. There is no extra credit for this option.

### Submission instructions:

To select Option 2, send an email with subject “EECS211 HW6” to the course instructor at [doemer@uci.edu](mailto:doemer@uci.edu) and include as separate attachments all the files that would like to adjust/add compared to your previous Assignment 5 submission. As before put your short description into the body of your email.

To ensure proper credit, be sure to send your email before the deadline: Monday, March 16, 2009, 12pm (noon). This deadline is hard!
