

EECS 22 Advanced C Programming**Fall 2012**

Teaching Assistant: Weiwei Chen
Email: weiwei.chen@uci.edu
Office Hours: Monday, 11:00am – 1:50 pm EH1141 or by appointment in EH323

Lab Syllabus

Lab Time: Mon, Wed 11:00am - 1:50pm

Lab Location: EH1141

By the end of each lab session, students will be able to...

1. Design their homework program
2. Discover the bugs in their program and identify the ways to fix them

Guidelines

1. Come prepared! Please read the homework assignment before the lab sessions!
2. We will have a lot learning activities to help you develop the critical thinking ability of how to design a program. Classroom participation is highly encouraged and expected!
3. You will write your program on your own. However, discussion with your fellow students is highly encouraged.
4. No additional assignments for the lab! There may be some lab practices to facilitate active learning but will not be graded at all.
5. No food or drink in the lab!
6. Facebook, gmail, and twitter are not to be used during lab!
7. Try to keep quiet as a courtesy to the other students in the lab.
8. Attendance is not mandatory!

Homework Policies

1. Submission deadline is strict: **Monday 11:59pm**. Late submission will not be graded.
2. The C source file should state your name and exercise number as a comment at the top of the file.
3. Use the exact file names as what is stated in the homework assignments
4. Homework must be turned in electronically by using the “/ecelib/bin/turnin22” script on the ladera server for EECS22.

Other Policies

1. Please post course or homework related questions to the **course messageboard**. We will monitor it and try to respond as often as possible.
2. Please start doing your homework **early**. Questions on the course messageboard may not be answered within **1 hour before** the homework deadline.
3. Please visit the lab sessions if you need help with your code.
4. Please send grading concerns or other administrative issues to the email account: eeecs22@eeecs.uci.edu, which will notice both the professor and the TA.
5. Email is an acceptable form of communication. However, emails sent **over the weekend** may not be answered until Monday and emails sent **after 9pm** may be answered the next morning.
6. Please email us if you need help out of the lecture / lab sessions.

Have fun with C programming!
