

# EECS 22L: Taxi Cab User Manual Grading Criteria

Prepared by: Nistha Tandiya, Shang Ma, and Prof. Rainer Dömer

February 10, 2015

The first deliverable in the *Taxi Cab Management* project is the initial version of the user manual that specifies the expected software product. While this document can be refined in the following weeks so that it matches the actual implementation in detail, it should describe the user experience of the software product as anticipated. Specifically, the user manual should describe the installation and use of the software by the user and contain a detailed description of the functionality with all options.

For full credit (100%), the document submitted by your team should include the following sections:

## **Title page**

- Software title, version
- Author/producer, affiliation

## **Front matter**

- Table of contents
- Glossary (of Taxi Management-specific terms)

## **1 Taxi Cab Management System**

- 1.1 Usage scenario
  - Sketch of a typical screenshot
- 1.2 Goals
- 1.3 Features

## **2 Installation**

- 2.1 System requirements
- 2.2 Setup and configuration
- 2.3 Uninstalling

## **3 Taxi Program Functions and Features**

- 3.1 Detailed description of client communication
  - User input, program output, screen shot, etc.
- 3.2 Detailed description of taxi communication
  - User input, program output, screen shot, etc.
- 3.3 Detailed description of routing and scheduling algorithm
  - ....

## **Back matter**

- Copyright
- Error messages
- Index
