# EECS 10: Computational Methods in Electrical and Computer Engineering Lecture 1

#### Rainer Dömer

doemer@uci.edu

The Henry Samueli School of Engineering Electrical Engineering and Computer Science University of California, Irvine

#### Lecture 1.1: Overview

- Introduction
  - Course overview
- Introduction to Computers
  - What is a computer?
  - What is programming?
- Course administration
  - Course web pages

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

2

#### Introduction

- Course Contents
  - Introduction to computers
  - Introduction to structured programming
    - · C, a high-level structured programming language
  - Binary data representation
  - Introduction to algorithm efficiency
  - Solving engineering problems
    - · Applications of structured programming
  - Hands-on experience
    - · Laboratory and discussion sessions

EECS10: Computational Methods in ECE. Lecture 1

(c) 2016 R. Doemer

3

## Introduction to Computers

- What is a computer?
  - Digital device capable of executing programs
    - · performing computations
    - · making logical decisions
- What is a program?
  - Set of instructions which process data
    - input data (e.g. from keyboard, mouse, disk)
    - output data (e.g. to monitor, printer, disk)
- What is programming?
  - Creation of computer programs by use of a programming language

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

4

## Introduction to Programming

Categories of programming languages

Machine languages (stream of 1's and 0's)
 Assembly languages (low-level CPU instructions)
 High-level languages (high-level instructions)

Translation of high-level languages

Interpreter (translation for each instruction)
 Compiler (translation once for all code)
 Hybrid (combination of the above)

· Types of programming languages

Functional (e.g. Lisp)

Structured (e.g. Pascal, C, Ada)Object-oriented (e.g. C++, Java, Python)

EECS10: Computational Methods in ECE. Lecture 1

(c) 2016 R. Doemer

5

#### **Course Administration**

- Course web pages online at http://eee.uci.edu/16z/18010/
  - Instructor information
  - Course description and contents
  - Course policies and resources
  - Course schedule
  - Homework assignments
  - Course communication
    - · Message board (announcements and technical discussion)
    - Email (administrative issues)

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

6

#### Lecture 1.2: Overview

- · Getting started
  - Obtain your UCInetID
  - Obtain an account on the EECS servers
  - Log into the server
- · Linux system environment
  - System commands
  - Text editing

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

7

## **Getting Started**

- Obtain your UCInetID
  - Your unique ID at UCI
  - Activation online at OIT (NACS) web pages:

http://activate.uci.edu/activate/menu.html

- Obtain an account on the EECS servers
  - Your working account in EECS
  - Activation online at EECS web pages:

https://newport.eecs.uci.edu/account.py

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

8

#### **Getting Started**

- Log into the server
  - Use a terminal with SSH protocol (secure shell)
  - Connect to the EECS Linux server
    - crystalcove.eecs.uci.edu
    - zuma.eecs.uci.edu
  - Authorize yourself with user name and password
- Work in the Linux system environment
  - Linux shell prints command prompt, awaiting input
  - Type in system commands
     echo, date, ls, cat, man, more,
     pwd, mkdir, cd, cp, mv, rm, rmdir
  - Refer to manual pages for help on commands

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

(c) 2016 R. Doemer

9

## Linux System Environment

- Linux system commands
  - echo print a message
  - date print the current date and time
  - list the contents of the current directory
  - cat list the contents of files
  - more list the contents of files page by page
  - pwd print the path to the current working directory
  - mkdir create a new directory
  - cd change the current directory
  - ср сору a file

EECS10: Computational Methods in ECE, Lecture 1

- mv rename and/or move a file
  rm remove (delete) a file
  rmdir remove (delete) a directory
- man view manual pages for system commands

## Linux System Environment

- Text editing
  - vi standard Unix editor
  - vim vi-improved (supports syntax highlighting)
  - pico easy-to-use text editor
  - emacs very powerful editor
  - many others...
- Pick one editor and make yourself comfortable with it!

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

11

## Linux System Environment

Example session (1/4):

```
login as: doemer
Password:
Last login: Mon Oct 1 08:20:09 2007 from beta.eecs.uci.e
If this system is busy, consider a less loaded one below:
vivian.eecs.uci up 30 days, 18:00, load average: 0.00, 0.00, 0.01 malibu.eecs.uci up 2826 days, 21:06, load average: 0.00, 0.00, 0.01 newport.eecs.uc up 23 days, 23:29, load average: 0.00, 0.00, 0.02 east.eecs.uci.e up 12 days, 4:56, load average: 1.46, 1.41, 1.68
Mon Oct 1 08:24:47 PDT 2007
% echo "Hello EECS10!"
Hello EECS10!

```

EECS10: Computational Methods in ECE, Lecture 1 (c) 2016 R. Doemer 12

#### Linux System Environment Example session (2/4): % cd homework % pwd /users/faculty/doemer/homework % ls % mkdir hwl % ls hw1/ % cd hwl % ls % vi program.c % ls program.c doemer@vivian% ls -1 total 2 1 doemer smmsp 51 Oct 1 08:32 program.c % more program.c This is my new program file. I don't know C yet... EECS10: Computational Methods in ECE, Lecture 1 (c) 2016 R. Doemer

#### **Linux System Environment** Example session (3/4): % cp program.c mybackup.c % 1s mybackup.c program.c -rw----- 1 doemer smmsp -rw----- 1 doemer smmsp 51 Oct 1 08:34 mybackup.c 51 Oct 1 08:32 program.c % cd .. /users/faculty/doemer/homework % ls hw1/ % /ecelib/bin/turnin EECS 10 Fall 2007: Assignment "hwl" submission for doemer Due date: Mon Oct 8 11:59:59 2007 EECS10: Computational Methods in ECE, Lecture 1 (c) 2016 R. Doemer

## Linux System Environment

• Example session (4/4):

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

15

## Lecture 1.3: Overview

- Introduction to Programming in C
  - History of C
  - Introduction to C
- · Our first C Program
  - Example HelloWorld.c
  - Structure of a C program
  - printf() function
  - Program compilation and execution
  - String constants

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

## Introduction to Programming

Categories of programming languages

Machine languages (stream of 1's and 0's)
 Assembly languages (low-level CPU instructions)
 High-level languages (high-level instructions)

Translation of high-level languages

Interpreter (translation for each instruction)
 Compiler (translation once for all code)
 Hybrid (combination of the above)

Types of programming languages

Functional (e.g. Lisp)

Structured (e.g. Pascal, C, Ada)Object-oriented (e.g. C++, Java, Python)

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

17

## History of C

- Evolved from BCPL and B
  - in the 60's and 70's
- Created in 1972 by Dennis Ritchie (Bell Labs)
  - first implementation on DEC PDP-11
  - added concept of typing (and other features)
  - development language of UNIX operating system
- "Traditional" C
  - 1978, "The C Programming Language", by Brian W. Kernighan, Dennis M. Ritchie
  - ported to most platforms
- ANSI C
  - standardized in 1989 by ANSI and OSI
  - standard updated in 1999

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

18

#### Introduction to C

- What is C?
  - Programming language
    - high-level
    - · structured
    - · compiled
  - Standard library
    - · rich collection of existing functions
- Why C?
  - de-facto standard in software development
  - code is portable to many different platforms
  - supports structured and functional programming
  - easy transition to object-oriented programming
    - C++ / Java
  - freely available for most platforms

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

19

# Our first C Program

Program example: Helloworld.c

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

20

### Our first C Program

- · Program comments
  - start with /\* and end with \*/
  - are ignored by the compiler
  - should be used to
    - modia bo acca te
    - document the program code
    - · structure the program code
    - · enhance the readability
- #include preprocessor directive
  - inserts a header file into the code
- standard header file <stdio.h>
  - part of the C standard library
  - contains declarations of standard types and functions for data input and output (e.g. function printf())

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

21

## Our first C Program

- int main(void)
  - main function of the C program
  - the program execution starts (and ends) here
  - main must return an integer (int) value to the operating system at the end of its execution
    - return value of 0 indicates successful completion
    - return value greater than 0 usually indicates an error condition
- function body
  - block of code
  - (definitions and statements)
  - starts with an opening brace ({)
  - ends with a closing brace ()
- printf() function
  - formatted output (to stdout)
- return statement
  - ends a function and returns its argument as result

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

printf("Hello World!\n");

/\* main function \*/

int main(void)

/\* EOF \*/

return 0;

22

## Our first C Program

- Program compilation
  - compiler translates the code into an executable program
  - gcc HelloWorld.c
  - compiler reads file Helloworld.c and creates file a.out
  - options may be specified to direct the compilation
    - -o HelloWorld specifies output file name
    - -ansi -wall specifies ANSI code with all warnings
- Program execution
  - use the generated executable as command
  - HelloWorld
  - the operating system loads the program (loader), then executes its instructions (program execution), and finally resumes when the program has terminated

EECS10: Computational Methods in ECE, Lecture 1

EECS10: Computational Methods in ECE, Lecture 1

(c) 2016 R. Doemer

(c) 2016 R. Doemer

23

## Our first C Program

• Example session: HelloWorld.c

```
% mkdir HelloWorld
% cd HelloWorld
% vi HelloWorld.c
% ls
HelloWorld.c
% ls -1
-rw-r--r-- 1 doemer faculty
                                            263 Sep 28 22:11 HelloWorld.c
% gcc HelloWorld.c
% ls -1
-rw-r--r-- 1 doemer faculty
-rwxr-xr-x 1 doemer faculty
                                            263 Sep 28 22:11 HelloWorld.c
                                          6352 Sep 28 22:12 a.out*
% a.out
Hello World!
% gcc -Wall -ansi HelloWorld.c -o HelloWorld
% ls -1
-rwxr-xr-x 1 doemer faculty 6356 Sep 28 22:17 HelloWorld*
-rw-r--r-- 1 doemer faculty 263 Sep 28 22:17 HelloWorld.c
-rwxr-xr-x 1 doemer faculty 6352 Sep 28 22:12 a.out*
% HelloWorld
Hello World!
```

## Our first C Program

- · Character string constants: "Strings"
  - start and end with a double quote character (")
  - may not extend over a single line
  - subsequent string constants are combined
  - text formatting using escape sequences
    - \n new line
    - \t horizontal tab
    - \r carriage return
    - \b back space
    - \a alert / bell
    - \\ backslash character
    - \" double quote character
- Experiments with the Helloworld program...
