

EECS 22L: Taxi Cab User Manual Grading Criteria

Prepared by: Huan Chen, Delaram Amiri and Prof. Rainer Dömer

Feb 14, 2017

The first deliverable in the *Taxi Cab* project is the initial version of the user manual that specifies the expected software product. While this document can be refined in the following weeks so that it matches the actual implementation in detail, it should describe the user experience of the software product as anticipated. Specifically, the user manual should describe the installation and use of the software by the user and contain a detailed description of the functionality with all options.

For full credit (100%), the document submitted by your team should include the following sections:

Title page

- Software title, version
- Author/producer, affiliation

Front matter

- Table of contents
- Glossary (of Taxi Cab Management)

1 Taxi Cab Management

- 1.1 Usage scenario
 - Sketch of a typical screenshot
